PROFILE

Graduate IT engineer with a passion for frontend development, UX/UI design, and problem-solving. Experienced in building responsive web applications using modern tools and frameworks, as well as creating C# desktop/web apps and Android apps in Java/Kotlin. Skilled in Figma for designing user-friendly interfaces. Actively working on personal projects to improve technical skills. Independent researcher who uses official documentation, MDN, Stack Overflow, and tutorials, and enjoys learning from others in a team to deliver practical solutions.

EDUCATION

Faculty of Technical Sciences Čačak (2020 - 2025)

- Graduate Engineer of Information Technologies

EXPERIENCE

Docus d.o.o.

Intern/Junior Software developer - since august 2025

- Tested and integrated Google Pay payments in a parking application using the CorvusPay sandbox environment.
- Developed C# desktop applications and Android apps (Java) to simulate and verify payment flows.
- Researched and implemented integration of the UPT1000F_IP165 payment terminal with the application, ensuring secure communication between the tablet and terminal for real-world parking transactions.
- Collaborated with team members to troubleshoot issues, optimize workflows, and ensure smooth payment testing.

EXPERIENCE

My online portfolio showcases real-world projects I developed using C#, Java/Kotlin, web technologies, including desktop, android and web apps. Emphasis on user-friendly design, responsive interfaces, and functional solutions. View it here: https://github.com/AnaVukajlovic
